

SAMPLERS

SAMPLE COCKS

- Manufactured as Butt-weld or Screwed entry style.
- Standard thread types available 1/2" BSP Male.
- All Sample Cocks can be supplied as Lockable units, the spindle handle has 2 opposing holes and can be padlocked through the locking plate that is welded to the body.

OPTIONS AVAILABLE:

- Extended body length for insulated tanks.
- A double spout version – this allows free draining of the spout and allows the inside to be rinsed after use.
- Made in Australia – beware of the CHEAP imported Asian copies.

VALENCHÉ / WINE THIEF / BARREL THIEF

- Available in Straight (100ml, 150ml) or Curved (100ml, 200ml)
- The curved design enables easy use between stacked barrels and has an adjustable swivel handle to suit left and right handers.

DIP TUBES

- Volumes of 250ml, 500ml, 750ml and 1 litre capacity.
- Manufactured with a weighted base for quick submergence of the sampler.
- A pouring spout for ease of controlled decanting.
- There is a stainless steel handle to attach a rope or chain. The chain is extra and available by the metre.

VINCENT SAMPLE NOZZLES

- Allows an aseptic sample to be taken from a product line or tank.
- A hypodermic needle easily penetrates the silicon rubber seal allowing a measured sample to be taken.
- The body is G316 stainless steel and is easily welded in place.
- The silicon seal is replaceable.
